Student handbook:

SETTING UP A WIRELESS NETWORK FOR LAPTOP

Prepared by:
Infrastructure of Information Technology

SETTING UP A WIRELESS NETWORK FOR LAPTOP

To have access to wireless network, you must follow the following steps:

Important:

For a first time quick installation and connection

1. Do step 1 and 2 from your work, house, or office before going to ESAN campus.
2. Steps 3 and 4 must be done on campus.

**For further information, please contact ServiceDesk at
Tel (511) 317-7200 anexx 44000**

BEFORE GOING TO CAMPUS

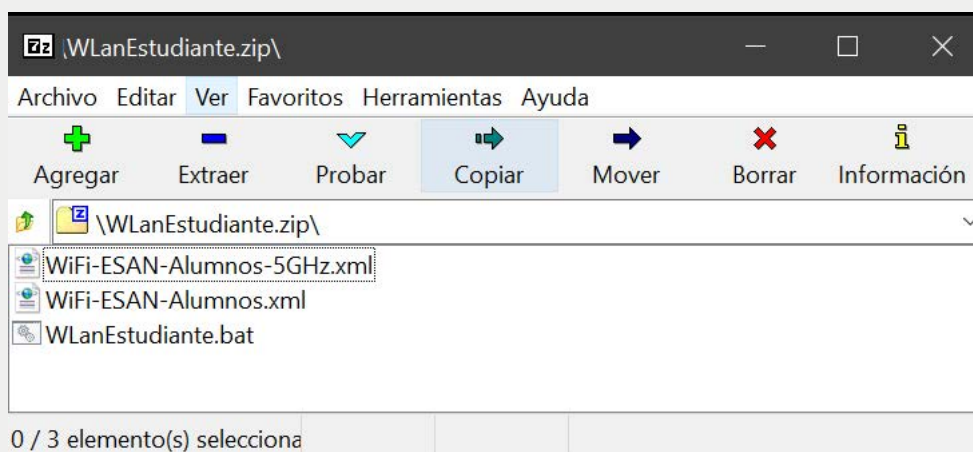

Step N° 1:

If you are at home, office or another place with Internet access, and your operating system is Windows, download the attached file in your laptop (MAC systems does not require to do steps 1 and 2).

Download 

Step N° 2:

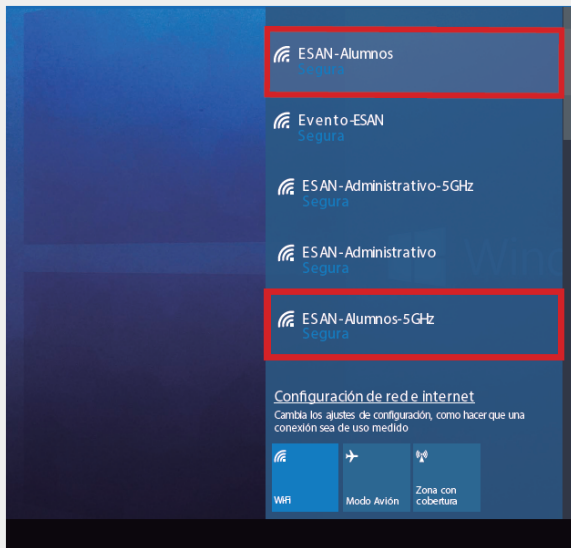

Extract all the contents of the ZIP file and then double click on the installer **WLanEstudiante.bat**

AT CAMPUS

Step N° 3:

Connect to the wireless network according to the compatibility of your system “**ESAN-Alumnos-5GHz**” o “**ESAN-Alumnos**”.

Example:

If your computer only shows **ESAN-Alumnos**, it's because your equipment is compatible with a standard frequency and can only connect at the speed your system allows.

If your computer shows **ESAN-Alumnos-5GHz** means that your equipment is compatible with this frequency and you can connect at a higher speed.

Step N° 4:

Log in with the following steps:

1 Connect

2 Type your username

3 Enter your password

4 Check your conexión
