

Student handbook: SETTING UP A WIRELESS NETWORK FOR SMARTPHONE OR TABLET

> Prepared by: Infrastructure of Information Technology

#### SETTING UP A WIRELESS NETWORK FOR SMARTPHONE OR TABLET

To have access to the wireless network, you must follow the following steps (for the first and unique time).

## AT CAMPUS

# Step N° 1:

Connect to the wireless network according to the compatibility of your system **"ESAN-Alumnos-5GHz**" o **"ESAN-Alumnos**".

<b>ESAN-Alumnos</b> Protegida		<b></b>
ESAN-Alumnos-5GHz Protegida		<b></b>
ESAN Personal Protegida		
ESAN-Moviles Protegida		
Oficina-ED		
Buscar Wi-Fi Directo	Configu	rar Más

### Example:

If you only see **ESAN-Alumnos**, it's because your equipment is just compatible with a standard frequency and you can only connect at the speed your system allows.

If you see **ESAN-Alumnos-5GHZ** means that your equipment is compatible with this frequency and you can connect at a higher speed.

# Step N° 2:

#### Enter your username and password
